

Environmental Officer's report
Santa Margarita Annual Parish Meeting
Sunday 9, May, 2021

Since last years meeting, there isn't much to report. The main difference is that now on the Esplanada in Es Castell there is a permanent mini recycling station. Besides hard plastic lids, there are separate bins for dead batteries, small electronics (old mobiles, MP3 players) light bulbs (both fluorescent and LED's), and ink cartridges. I will be happy to deposit these things for you, so feel free to bring them to me at the church.

We still have receptacles in the back of the church, the tapón receptacle, and now a container where you can deposit used coffee/tea pods. I will also happily deposit these for you. At the San Lluís Eroski there is a large bin for recycling these.

For your information, there is a large recycling center in the San Lluís polígono just down the road from Eroski. Beyond collecting the normal glass, paper and plastic packaging materials, they collect old (larger) electronics, things made of metal, building materials and scraps, and all sorts of stuff. Check it out!

As we are an Eco Church, Thank you for loving our environment and making a difference! Happily submitted,
by your Environmental officer, Kate Strudwick
